

BRUISER

BRACHYTIC DWARF (BD) BMR SORGHUM SUDANGRASS

BRUISER is a brachytic dwarf BMR sorghum-sudan that overcomes many of the difficulties of grazing or haying older tall varieties.

Brachytic Dwarf means a hybrid that has shortened internodes but additional leaves, so quality is enhanced without sacrificing yield.

BRUISER has excellent grazing qualities with rapid and abundant regrowth after grazing or swathing. The BMR genetics coupled with the shortened internodes, makes this hybrid very palatable and nutritious, while at the same time, leaving foliage accessible to livestock.
